

High performance computing

Final colloquium

10-15 minutes talk
15-20 minutes discussion

Suggested structure

- **Introduction**

- What did you do? How did you do it (programming model)?

- **Methods**

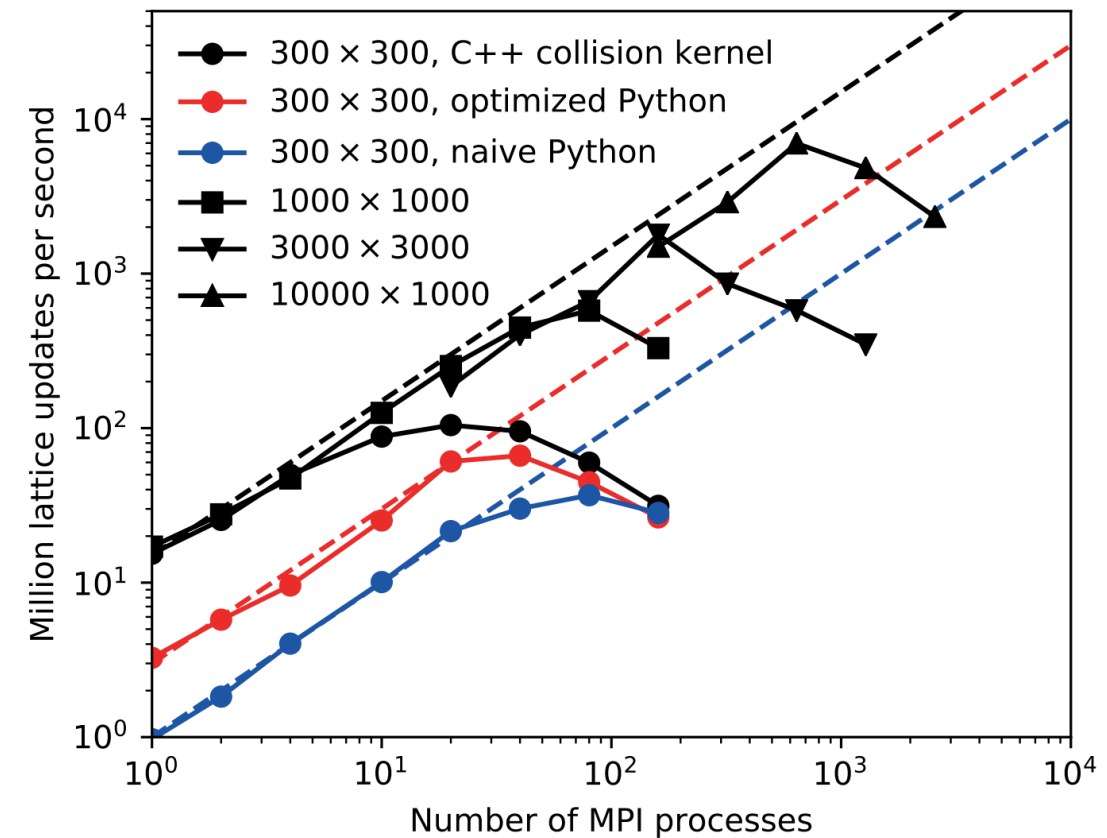

- Details about your programming model. How does it work? How is different from what we did in the lecture?
- Advantages and pitfalls

- **Results**

- You wrote a code. Show us that it works. (A video of the sliding lid.)
- Performance: Compute the number of (billion, 10^9) lattice update per second

- **Discussion**

- What did you learn? What would you do different next time
